ANALYSIS / ACTION PLAN
Brazil monthly goal and activation fleet: Operational performance was heavily impacted by a high volume of mechanical issues (95 events), technical downtime (16 events), and fleet availability constraints, resulting in only 64% of the fleet being active. We reallocated already VIDs and drivers, which takes time, we are pushing them to work on weekends as well, but still weather has become another heavy issue as we are entering the winter season.

ANALYSIS / ACTION PLAN

Two drivers offboarding, we'll keep 7 drivers. Goal met without a single driver meeting baseline, TKM should be higher.

 NEXT WEEK PRIORITIES

- Deliver Brazil and Chile monthly targets.
- Maximize fleet utilization and reduce vehicle downtime.
- Continue proactive driver and vehicle reallocation.
- Maintain high daily mapping productivity.
- Mitigate weather and operational risks.
